

Organisation name	50-word description	Grant request	Wales location	Theme
Cae Rhug	The Forage, Nest and Rest project will create a 1km pathway of new wildlife-supporting habitat and areas for people to connect with nature and each other. Providing food plants for wildlife, particularly birds but also for people and increasing nesting and resting sites for wildlife and people along this route.	£49,641.52	Flintshire	Biodiversity
Care and Repair North East Wales	We will enhance and conserve the biodiversity of Dee Park, a 27acre community greenspace by improving the wildlife habitats, incorporating a nature trail and, by appointing a project officer to recruit and upskill volunteers, run educational sessions with schools, giving local people a long-term role in running their local park.	£49,500.00	Flintshire	Biodiversity
Challenge Wales	Challenge Wales will be developing a	£7,537.86	Vale of Glamorgan	Biodiversity

	transformative educational initiative for 290 young people in the community spotlighting the detrimental impact of one-use plastic in the marine environment and will include removing some of the microplastic litter waste along Cardiff Bay to enhance the local area.			
Cymbrogi Community CIC	Empowering our community to shape tomorrows sustainable world. A programme of workshops and activities supporting people from different generations and backgrounds to understand that humankind depends on being nature-kind if we are to have a thriving and habitable planet.	£19,837.80	Pembrokeshire	Waste minimisation
Environment Centre	A Swansea Repair Space, where volunteers are supported to regularly repair wanted items, open to the public for free repairs two days a week. An awareness campaign, annual event, skill-based	£43,362.50	Swansea	Waste minimisation

	workshops and improved access via e-cargo bike collections and out-of-hours drop off/collections with local collaborators will complement this core provision.			
Gelligaer & Merthyr Commons Ltd	The project aims to focus on three wildfire hot spots on Gelligaer & Merthyr Common. Working in partnership with SWFRS and Natural Resources Wales, we will demonstrate the level of land management required to manage the risk, protect the environment, safeguard communities whilst ensuring the common remains a working landscape	£49,999.00	Swansea	Biodiversity
Gilfach Goch	Our Environment, Our Community will work with the community to develop areas for wildlife and food growing to co-exists, enabling food to be grown for distribution around the valley and areas of wildflower meadows and biodiversity hubs to	£49,991.96	Rhondda Cynon Taff	Waste minimisation

	benefit the much wider space.			
Groundwork Caerphilly	The decline of Welsh Mountain ponies has contributed to increased hillside scrub growth with attendant fire risk and grazing loss. These ponies manage scrub by grazing but can also provide power for sustainable technologies such as bracken bashers. The project will demonstrate pony power for low impact land management technologies.	£30,031.00	Caerphilly	Biodiversity
Gwent Wildlife trust	The project will restore and enhance important woodland and peatland habitats at Gwent Wildlife Trust's Henllys Bog Nature Reserve to protect rare and vulnerable species; working with volunteers and local communities to engage them in taking action for nature now and in the future.	£29,433.00	Monmouthshire	Biodiversity
Little Lounge	The Little Eco Gardens are innovative community green spaces, situated at	£49,956.50	Rhondda Cynon Taff	Wider environmental enhancement

	<p>the heart of the former coal mining village of Cilfynydd. Creating access to learning about growing food, bio-diversity and sustainability. These multi-purpose outdoor areas are an extension of The Basement Community Hub and Outdoor Adventures Early Years projects.</p>			
<p>Marine Conservation Society</p>	<p>Through this citizen science Seasearch Wales project, we'll work with volunteers to increase the collection of data from crucial marine habitats in 4 regions of Wales; connecting communities with the ocean, whilst supporting biodiversity and ecological resilience.</p>	<p>£49,337.35</p>	<p>Anglesey Neath Port Talbot Pembrokeshire Swansea</p>	<p>Biodiversity</p>
<p>Newport Mind</p>	<p>Our building is used by the people of Newport who require help or support with their mental health. Solar panels will help us become more energy efficient and reduce our energy costs, providing us with financial sustainability and in turn</p>	<p>£49,999.00</p>	<p>Newport</p>	<p>Wider environmental enhancement</p>

	increasing our ability to be there for those in need.			
North Wales Wildlife Trust	The Wales Resilient Ecological Network project implements a collaborative pan-Wales framework to facilitate more effective action to tackle invasive non-native species impacts on the environment, economy and wellbeing of the people in Wales. Working directly with communities to protect and build healthy resilient ecosystems and to maintain and enhance biodiversity.	£178,010.09	Pan Wales	Biodiversity Wider environmental enhancement
The Hwb Torfaen	The eco-refurbishment of WRCC will reduce our environmental impact, encourage eco-friendly action, and enable future sustainability for 1000 community members who use WRCC. We will install solar panels and lighting, a bike rack, recycling points, run 8 promotional activities and recruit 5 new climate champion volunteers for the organisations.	£49,087.00	Torfaen	Wider environmental enhancement

The Venture	The "lechyd Da" Project aims to bring "good health" and wellbeing to The Venture and Caia Park community. It will create a community allotment a green volunteer workshop, forest school, and increase biodiversity and sustainability. The project will also involve and benefit asylum seekers, refugees, local schools, volunteers.	£49,996.96	Wrexham	Wider environmental enhancement
Welshpool Football Club	Creating an accessible wildlife environment around three new football pitches to ensure that the area is of benefit not just to over 200 junior footballers and their families, but to dogwalkers and members of the local community who wish to enjoy the tranquillity and wildlife of this beautiful area.	£5,703.14	Powys	Wider environmental enhancement
